

URGENT UPDATE: Music U Scheduler v1.3.01

Critical Authentication Fix Available

Version 1.3.01 resolves critical login issues that prevented users from accessing the Music U Scheduler application.

Quick Update Instructions

For Existing Installations

```
cd music-u-scheduler-frontend
git pull origin main
./manage-services.sh restart all
```

For New Installations

```
git clone https://github.com/dfultonthebar/Music-U-Scheduler.git music-u-scheduler-frontend
cd music-u-scheduler-frontend
./install.sh
```

What's Fixed

- **Login Issues:** Complete resolution of authentication failures
- **NextAuth.js Errors:** Fixed compilation and runtime errors
- **Session Management:** Proper cookie and JWT session handling
- **Environment Variables:** Added required NEXTAUTH_SECRET
- **Build Errors:** Resolved TypeScript compilation issues
- **Service Stability:** Enhanced frontend/backend integration

Login Credentials

After updating, use these credentials to access the admin dashboard:

- **URL:** `http://localhost:3000/login`
- **Username:** `admin`
- **Password:** `MusicU2025`

Verification

After updating, verify your installation:

1. **Check services are running:**

```
bash
./manage-services.sh status
```

2. **Test login:** Navigate to `http://localhost:3000/login` and log in with the credentials above

3. **Access admin dashboard:** You should now be able to create users, manage settings, etc.

Troubleshooting

If you still experience issues:

1. **Force restart services:**

```
bash
./manage-services.sh restart all
```

2. **Check installation:**

```
bash
cd app && yarn install
```

3. **Clear browser data:** Clear cookies/cache for `localhost:3000`

Support

If problems persist, the authentication test script is available:

```
python3 test_login_credentials.py
```

Release Date: August 17, 2025

Priority: CRITICAL

Action Required: Update immediately
